Investment Narrative

Quarter ending September 30, 2023

The Long-Term portfolio was down 2.5% for the quarter which was in line with the policy index that was down 2.4%. Without any exposure to private markets, the portfolio was at the mercy of the public markets. All the asset classes were negative for the quarter but the main contributors to the slight underperformance against the benchmark were the allocations in domestic large-cap equity, lengthened duration within the fixed-income book and manager performance in the hedge fund book.
